

## MMP100 | WEB DEVELOPMENT PROJECT STATEMENT

Title: To All The Zodiac Signs I know

Semester/Year: Spring 2020

Coding language/software: Brackets

Instead of making a “choose your own adventure” story, I decided to try out a concept which I thought would look cool as a website. The story highlights how I perceive each of the 12 zodiac signs, and the concept is inspired by a Netflix film called ‘To All The Boys I’ve loved before’. The colors of the web pages have been inspired by the color palette from the film, and I have written each description of each zodiac sign in the format of a letter to pertain to the main character in the film writing love letters. The most challenging part of the project was having to refrain from making mistakes with typography as small mistakes can lead to great problems in the final product, and I overcame this problem by taking the time to check the html files over and over again with great patience.
